

“Made From The Best Plant On Earth”

What is CBD?

CBD is truly one of the most remarkable compounds in the natural world. Cannabidiol, is also known as CBD. Cannabidiol is a member of the Cannabis family. The more we learn about CBD, the more it seems poised to revolutionize medicine as we know it.

CBD abbreviation stands for Cannabidiol

Difference of Marijuana plant and Hemp Plant. Marijuana is high in THC, Hemp is high in CBD.

What is the Endocannabinoid System and Why is it Important?

The Endocannabinoid system runs throughout your body and it is loaded with receptors that react extremely well to Cannabinoids such as CBD.

CBD1 & CBD2 Receptors/CBD as Antagonist

CB1 Receptors are in your brain, spinal cord, cerebellum, brainstem, olfactory bulb, thalamus, hypothalamus, pituitary, thyroid, upper airways, liver, adrenals, ovaries, uterus, prostate and testes.

CB2 Receptors are in your eyes, stomach, heart, pancreas, digestive tract, bones, spleen, thymus and tonsils.

CBD acts as an antagonist when introduced into the endocannabinoid system and wakes up receptors that are not functioning properly.

Delivery Systems of CBD through the variety of Miracle Nutritional Products is a different delivery method.

Benefits of CBD

CBD is a natural pain reliever, anti-inflammatory, neuroprotectant and has calming and focusing effects. You can google “benefits of CBD” to do your own research on the benefits of CBD.
